RESEARCH STATEMENT

With the belief that ‘*Serious inquiry into human nature is not a luxury*,’ I study how personality traits and situational factors jointly shape human behavior—spanning socially constructive behaviors (e.g., prosociality) and behaviors that are harmful to oneself or others (e.g., dishonesty, delinquency). I am currently applying this **person–situation interaction perspective** to the study of delinquency and bystander intervention.

Grounded in rigorous empirical methods, I am equally drawn to theoretical integration—delineating micro-level psychological processes and linking them to broader macro-structures.

While psychology remains my ‘*Forever Moonlight*,’ I have interdisciplinary interests and pursuits. At present, I am actively bridging psychology with criminology, behavioral economics, and sociocultural perspectives. I am additionally interested in philosophy of science (meta-science)

and computational social science.

Support good science – open, rigorous, and trustworthy science – always on the way.
